

# PARTNER PLEDGE

*At Integrity, our commitment to our partners goes beyond providing exceptional environmental testing services – we strive to be a trusted ally. Here’s how our core values guide us in helping you achieve success.*

## **S**ervice

We will get out to the site within 24 hours (Mon-Sat) and usually the same day of your request. Our partners are our priority!

## **E**xcellence

The majority of our testing has instantaneous results (category delineation, mold/air quality, surface contamination, lead, and VOC). We can usually get lab results for asbestos in less than 24 hours with a full report to you the next business day. Our commitment to excellence ensures that your project keeps moving forward in a timely manner.

## **T**eamwork

We have team members dedicated to supporting every level of your company. From field teams to finance, everyone in your organization will have a dedicated Integrity member working closely with them every step of the way.

## **F**lexibility

We have technicians stationed from Colorado Springs to Fort Collins. We can get to your job sites quickly. We are where you need us to be.

## **I**ntegrity

Evidence based criteria to determine the true category of loss and scope of work. You will have scientific data to support your project and ensure the job is done right.

## **R**elationships

We support you and your clients in dealing with insurance companies. We provide free consult calls and written materials in order to help your client navigate through the challenges of insurance claims.

## **E**ducate

Free resources for your team and clients. Through blogs, videos, and in person training we provide your team members with understanding of environmental hazards and testing methods to mitigate them.

***We intend to “Set Fire” to the Restoration Industry.***

***Providing the absolute best care and service to our partners and clients, we are redefining what it looks like to work with an environmental testing company.***
